BADAL TOMAR

tomarbadal9@gmail.com | badaltomar.vercel.app | github.com/badaltomar | linkedin.com/in/badaltomar

SUMMARY

Software Engineer experienced in full-stack JavaScript (React, Node.js, Express), Java, SQL and REST APIs. Strong in debugging, test automation and secure coding; works with Git, Docker, Linux and CI/CD. Experienced in remote collaboration and technical documentation.

WORK EXPERIENCE

Software Engineer / AI Evaluation Engineer (Contract)
Jan 2026 - Present

Handshake AI — *Remote*

- Authored and validated software engineering benchmarks and coding assessments across multiple programming languages, helping train and improve next-generation AI systems.
- Built verification pipelines with Docker, Git and Bash, enforcing consistent standards and improving edge-case coverage.

Software Engineer
Jan 2025 - Jan 2026

Neog Camp — *Bengaluru, Karnataka*

- Built a production-ready CRM web application from scratch to manage customer relationships, track interactions, and support scalable workflows with dashboards and data visualizations.
- Refactored from client-side local storage to a backend architecture with authentication and server-side validation, improving data consistency, security and multi-user support.
- Optimized the company website's performance and responsiveness and built reusable components, then documented them for the team.
- Mentored junior developers through code reviews and debugging, raising code quality across the team.

PROJECTS

Eterris - CRM Platform 🔗
Sep 2026

Full-stack lead management platform for streamlining sales workflows and real-time pipeline analytics.

- Built a scalable MERN architecture with React.js and Node.js/Express REST APIs.
- Developed an interactive dashboard using Chart.js for tracking revenue and agent performance.
- Implemented dynamic filtering and sorting logic using URL parameters for advanced lead discovery.
- Designed MongoDB schemas to efficiently manage complex lead-to-agent relationships.
- Created a responsive, professional UI using modern CSS Grid/Flexbox and custom animations.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, React Router, Chart.js, REST APIs

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL (MySQL/PostgreSQL)
Web Tech: React.js, Next.js, Node.js, Express.js, REST APIs, MongoDB, Data Structures & Algorithms, OOP
AI & Tools: LLM Evaluation, AI Quality Assurance, Model Benchmarking, Prompt Engineering, Code Review, Test Automation, Edge Case Analysis, Git, Docker, Linux, CI/CD

EDUCATION

Master of Computer Applications (MCA) - GPA: 3.8 / 4
2023 - 2025

Uttaranchal University — *Dehradun, Uttarakhand*

Full-Stack Web Development
2025 - 2026

NeoG Camp - by Tanay Pratap (Ex-Senior Software Engineer @Microsoft)
